

Suburban Design Guide Supplementary Planning Document SPD2

Since May 2022, the new administration in Croydon has been delivering on its revised planning promises. The borough wide hated Suburban Design Guide, Supplementary Planning Document 2019 (SPD2,2019), a “developers’ charter“, has been scrapped. This planning document helped facilitate and fast track inappropriate development across the borough. Planning committee decisions are now being made after careful examination, instead of simply being waved through by the ‘previous administration’ controlled planning committee. Now is the time, to breathe a sigh of relief.
